

DICE MATH

Fact Families

Gather two (2) dice. Roll both dice. Copy the numbers from the dice onto the first two lines of problem A. Add them together to find sum. Then change the order of the addends for problem B. Add them together to find the sum. The total should be the same. You will then take the sum of A & B and place it in the first blank of C and place one of the numbers that was an addend in the second blank of C. You will then subtract those numbers. You should get the remaining number (which was formerly an addend.) Keeping the same beginning number from C, place it in the first blank of D. In the second blank, place the number that was in the difference blank of C. Subtract these numbers.

Ex.) A $\underline{1} + \underline{2} = \underline{3}$ C $\underline{3} - \underline{1} = \underline{2}$
 B $\underline{2} + \underline{1} = \underline{3}$ D $\underline{3} - \underline{2} = \underline{1}$

1) A _____ + _____ = _____

B _____ + _____ = _____

C _____ - _____ = _____

D _____ - _____ = _____

2) A _____ + _____ = _____

B _____ + _____ = _____

C _____ - _____ = _____

D _____ - _____ = _____

3) A _____ + _____ = _____

B _____ + _____ = _____

C _____ - _____ = _____

D _____ - _____ = _____

4) A _____ + _____ = _____

B _____ + _____ = _____

C _____ - _____ = _____

D _____ - _____ = _____

5) A _____ + _____ = _____

B _____ + _____ = _____

C _____ - _____ = _____

D _____ - _____ = _____

6) A _____ + _____ = _____

B _____ + _____ = _____

C _____ - _____ = _____

D _____ - _____ = _____
